

Jim Alkove, Director of Program Management, Microsoft Corporation

As Director of Program Management for the Enterprise and Security group, Jim is responsible for the overall security of Microsoft's products and services. Jim leads several of Microsoft's major security functions including: Device Security, OS Management, OS Security and Security Assurance, and Licensing and Deployment. Jim is also responsible for Microsoft's security operations, privacy, anti-piracy, IT governance, risk management, and compliance strategy.

Jim is a long-time Microsoft veteran. A prolific inventor who holds over 40 U.S. patents, Jim has experience working on a variety of digital media and media content protection technologies. Jim is a founding member of Microsoft's digital rights management efforts, and he served as an architect and developer for Microsoft's in-home media streaming technology, as well as digital cable support in Windows Media Center.
