BIO-CONVERGENCE

THE NEXT ECONOMIC GROWTH ENGINE OF ISRAEL

► The Bio-Convergence Revolution

Breakthroughs in life sciences combined with accelerated development in engineering and miniaturization, computation, data processing and artificial intelligence are driving a new wave of innovation. This technological wave is called the Bio-Convergence revolution and it carries an enormous potential for a direct economic impact of up to \$4 trillion a year over the next 10 to 20 years. Bio-Convergence applications are not limited to healthcare and can be implemented in diverse fields such as agriculture, food, climate, security, energy, construction, and more.

► Bio-Convergence: A Strategic Domain

Israel Innovation Authority (IIA) recognized Bio-Convergence as a strategic domain to build the next economic growth engine of Israel. The advancement of this field will allow Israel to become a powerhouse for the next transformative Bio-Convergence revolution and among the world's health leaders of the future. Israel has a few major competitive advantages including top life sciences research, superior AI and computation capabilities, and an established industry of local and multinationals players. Bio-Convergence relies on the practical, integrative capabilities, which are at the base of Israel's greatest inventions.

► The National Bio-Convergence Program

A professional steering committee has been appointed by the Israel Innovation Authority to formulate a national Bio-Convergence Program and to present its recommendations to the National Research and Development Infrastructure (TELEM Forum) which include key stakeholders from academia, healthcare, industry, and venture capitals.

The forum identified five main areas of intervention which will support the Bio-Convergence field and accelerate its development in order to sustain a strong Bio-Convergence ecosystem. Those contents include: the establishment of dedicated R&D infrastructures

in academia and industry; the promotion of research excellence that will lead to the creation of IP in the Bio-Convergence field; development of integrated human capital to match the needs of the Israeli Bio-Convergence industry; formulation of regulation that suits the needs of this new emerging field; as well as providing financing solutions for early and high-risk interdisciplinary R&D.

Total activities that will be leveraged by the State of Israel investments in the field of Bio-Convergence over the next five years, are expected to reach close to NIS 2 billion. In the future, the overall aim is to significantly expand the initial program with an emphasis on aspects of academic research in the Bio-Convergence fields.

Achievements in 2023: Advancing Bio-Convergence through Strategic Initiatives

In 2023, the IIA made significant strides towards TELEM forum objectives. This proactive approach involved establishing and investing in three dedicated multidisciplinary infrastructures to amplify academic and industrial Bio-Convergence activities. Another key achievement was the development of a diverse, skilled workforce. The IIA supported the qualification and empowerment of 1000 biologists and engineers through specialized programs, designed to nurture multidisciplinary skills. Furthermore, the IIA played a pivotal role in advancing research and development in bio-convergence. Substantial financial backing was provided for innovative proposals, with the aim of enhancing activity in both industry and academia, contributing to the dynamic evolution of the Bio-Convergence landscape. In a bold move to encourage disruptive technologies in the health sector, the IIA launched a special call for proposals tailored for companies working on Bio-Convergence technologies lacking a clearly defined regulatory path. Those initiatives showcase the IIA's commitment to pushing the boundaries of innovation and facilitating pioneering solutions at the intersection of biology and technology.

Health AI @ Google

Google Research and Health AI teams are proud to sponsor MIXiii and share our work to advance technology in healthcare, in partnership with global caregivers and communities.

Through our work, we strive to harness transformative AI technologies in order to make healthcare more accessible, accurate and affordable for everyone, everywhere.

WELCOME LETTER

Dear Industry Colleagues,

On behalf of IATI, the Steering and Scientific Committees of MIXiii Health-Tech.IL, we would like to welcome you to **MIXii Health-Tech.IL** conference and exhibition at the International Convention Center (ICC), Jerusalem.

MIXiii Health-Tech.IL is the leading conference in Israel for the Health-Tech & Life Science Industries, bringing together the Life Science and Health-Tech communities from around the world and showcasing the thriving Life Science and Health-Tech environment in Israel. Due to its importance, MIXiii Health-Tech.IL is heavily supported and promoted by Israeli governmental offices and authorities.

The healthcare industry continues to shift towards a more integrated ecosystem, converging biopharma, MedTech, digital health and healthcare into a single bio-convergent industry. This year's conference program will feature a mixture of various tracks, sessions, lectures from industry experts, and panel discussions focusing on Innovations in Drug Research (research tools and products), Cell-Based Technologies interfacing Health and FoodTech, the special advantages of doing research with Israeli HMOs and hospitals, Rare Diseases, Innovation in Diagnostics, a session led by Israel's Tech Transfer Network and many more. This year will also include a special track focusing on Digital Health and two satellite events focusing on Academic-Hospital Innovations in Israel and Innovation in Ophthalmology.

As Israel's umbrella organization of the High-Tech & Life Science industries, **Israel Advanced Technology Industries Association (IATI)** continuously acts to connect and promote the country's massive resources of academic and technological prowess towards creating a fertile ecosystem which drives innovation and progress.

We would also like to thank the respective MIXiii Health-Tech.IL *Steering Committee members*: Prof. Ronni Gamzu, CEO of Tel Aviv Sourasky Medical Center – Ichilov, Itzik Ozer, Senior Director - Business Director at the Jerusalem Development Authority, Shomrat Shultz, Deputy Head of Growth Division, Sr. Director, Business Development at the Israel Innovation Authority, Dr. Uri Yaron, Senior VP, Abbott and the *Scientific Committee members*: Prof. Roni P. Dodiuk-Gad, Faculties of Medicine, Technion - Institute of Technology, Israel & University of Toronto, Canada and Emek Medical Center, Dr. Eran Harary, SVP, Global Head of Early Clinical Development, Global R&D at Teva Pharmaceuticals, and Prof. Eyal Mishani, Director General, Research Fund of the Hadassah Medical Organization and Head of R&D Division at Hadassah Medical Organization, as well as, the *OIS Summit Steering Committee members*: Nahum Ferera, CEO & Co-Founder, EyeYon Medical, Dr. Daphne Haim-Langford, Founder & CEO, Tarsier Pharma and Prof. Anat Loewenstein, MD, MHA, Chair, Head of Ophthalmology Department at the Tel Aviv Medical Center.

This year, more than ever, we see great importance in holding MIXiii Health-Tech.IL to support the Israeli industry and emphasize the resilience of the Israeli Health-Tech ecosystem.

We look forward to welcoming you to the conference.

Sincerely,

Karin Mayer Rubinstein
CEO & President
Israel Advanced Technology
Industries Association (IATI)

Sciences Ltd.

Sullivan's Life Sciences Group is an interdisciplinary team made up of lawyers from our various practice groups who have expertise with the legal and business issues important to life sciences companies, their investors, and life science developers.

By efficiently drawing on our collective areas of experience, we represent our clients in all aspects of their businesses, including private equity, debt and public financing, strategic alliances, collaborations and licensing, intellectual property, commercial and intellectual property litigation, mergers and acquisitions, capital markets, tax, government contracting, real estate development and environmental impacts and regulations, and employment and labor law.

Our track record with pharmaceutical, therapeutic, digital health, medical device companies and global enterprises demonstrates the value of our multi-lingual, multi-cultural team in Israel and the U.S. We understand the dynamics of very different markets, clinical trials, deftly bridging cultural, time-zone and language differences worldwide. We advise on regulatory, securities and other complex corporate law and funding issues.

ATTORNEY ADVERTISING

we invite you to consider us as your future partner

Merck

Merck KGaA, with headquarters in Darmstadt, Germany, is a global team of science and technology specialists in Healthcare, Life Science and Electronics. We believe in science as a force for good.

We make a positive difference in millions of people's lives.

In Healthcare, we develop innovative pharmaceuticals for unmet challenges, particularly in Oncology, Neurology & Immunology, Fertility and Endocrinology.

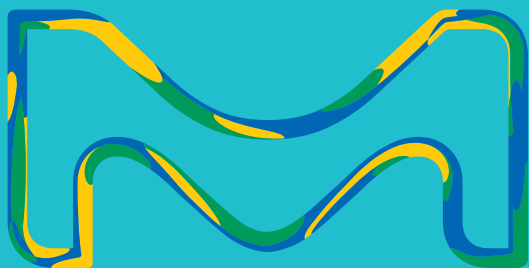

In Life Science, our tools, services and digital platforms empower scientists and engineers in delivering breakthrough therapies more quickly.

In Electronics, we create the next generation of materials and solutions for the semiconductors industry.

Merck in Israel

Merck has recognized decades ago the high level of science in Israel. It now operates in Israel active research and development centers in all three of its fields of interest and is highly involved in the Israeli ecosystem. Merck collaborates with leading local academic institutions, medical centers, the Israel Innovation Authority and entrepreneurs. Through various programs and local innovation incubators, Merck supports new ideas on their way to world markets.

Merck is constantly scouting the vibrant Israeli ecosystem for innovations in its areas of interest.

We invite you to consider us
as your future partner.

Israel
Tel: 972-73-713-6313
Email: iati@iati.co.il
Web site: <https://www.iati.co.il/>

Company description: A nonprofit association of Israel's advanced tech industry players, IATI is on a mission to foster business certainty and stability for advancing Israel's high-tech and health-tech industries. This, in turn, furthers national resilience and inclusive economic growth and strengthens Israel's

position as a global innovation leader.

We achieve these goals by bringing together industry players and voicing their shared concerns, to influence public policy decisions. We educate and provide data and knowledge about the industry to the public administration and various stakeholders through periodic reports and advocacy activities. Finally, we serve as a platform for strategic dialogue and leverage our members' network to facilitate the resolution of some of the industry's most sensitive challenges. The value we generate for our members is paid forward through their active commitment to diversity & inclusion in tech to advance social mobility.

Italian Trade Agency

Address: 3 Daniel Frisch St. Tel Aviv
Tel: 00972-3-6918130
Email: telaviv@ice.it
Web site: <https://www.ice.it/en/markets/israel>

Company description: The ICE - Italian Trade Agency is a government organization that provides information, assistance, consulting, promotion and training to Italian companies. In addition to its Rome headquarters, ICE operates worldwide from a large network of Trade Promotion Offices linked to Italian embassies and consulates and working closely with local authorities and businesses.

ICE provides a wide range of services helping Italian and foreign businesses to connect with each other:

- Identification of possible business partners
- Bilateral trade meetings with Italian companies
- trade delegation visits to Italy
- official participation in local fairs and exhibitions
- forums and seminars with Italian experts

The ICE Promotional Program Initiatives aim to provide an overall system image, which is representative of all areas of excellence leading players in each sector.

The promotional activities for the Italian innovative ecosystem specifically, are planned and based on strategic guidelines laid down in consultation with the public and private stakeholders, by the industry, trade associations and research centers.

The primary objective of the intervention is to promote scale up and globalization of the local ecosystem.

We are on mission to build a **DIGITAL ECOSYSTEM** through **PARTNERSHIPS**

We're on a mission to transform healthcare from a traditional health benefits service to a proactive, whole-health partner, serving people across their entire health journey.

We're not "your mother's health insurance." We apply digital tools and data-driven insights that enable us to proactively impact health access and outcomes for over 48 million members.

Driving
sustainable
healthcare

Care means the world

The people you see here have two things in common. They were all patients at some point, and they all have a place in nature that they longed to get back to. A beautiful place on earth that brings joy to their lives. A place where they feel free.

At Philips, we're driving sustainable healthcare. This means creating the best possible solutions to help healthcare professionals care for patients and the planet with the same attention and urgency.
